

## NOW IS THE TIME TO TREAT PONDS NATURALLY

### Product Attributes

- Improves water clarity
- Safe, natural, and 100% biodegradable
- Easy to use, no mixing required
- Targets suspended organic matter
- Reduces sludge layer
- Replaces chemicals and copper

### When to use Natural Blast™

- To control organic matter and manage temperature spikes
- When starting a new pond with an unknown history
- To clean up the sludge layer
- Initial treatment of the season and to speed up results during the season
- When high amounts of organic matter are found throughout the water column

### Dosage

One packet will treat 125,000 gallons of water. Natural Blast™ can be applied every 7 days.

### Directions

Calculate pond volume:  $Length \times Width \times Depth \times 7.5 = Total\ Gallons$

#### Pond Treatment (based on number of gallons)

- Add 1 Natural Blast™ packet for every 125,000 gallons of water  
*Example: To treat 500,000 gallons of water it requires 4 Natural Blast™ packets*
- Repeat every 7 days until desired water clarity is achieved

#### Application Directions

- Start treatment as soon as water reaches 45°
- Distribute water soluble packets evenly throughout pond
- Repeat every 7 days until desired clarity is achieved
