

NOW IS THE TIME TO TREAT PONDS NATURALLY

Product Attributes

RUSH IS A WATER OXIDIZER AND POND CLEANER: Oxidizers accelerate the decomposition of floating organic matter. RUSH has been successfully used to maintain healthy clean water.

- Alternative for algaecides like copper and chemicals
- Safe, natural, and 100% biodegradable
- Breaks down floating organic matter
- Granular Oxidizer

When to use RUSH

- When you have accumulated floating organic matter
- In conjunction with Healthy Ponds® AquaSpheres and Blast™
- When rocks around the pond turn green

Dosage

Floating Organic Matter

Apply 5 lbs. RUSH evenly over 400 sq.ft. of surface every 7 days as needed for removal and control.

Water Treatment

Ponds: Apply 5 lbs. of RUSH evenly into 30,000 gallons of water.

Ornamental water features: Apply 1 cup RUSH evenly into 4,500 gallons of water.

Health Maintenance

Ponds: 1 cup RUSH treats 30,000 gallons; 5 lbs. RUSH treats 250,000 gallons, can be treated every 7 days as needed.

Ornamental water features: 1/4 cup RUSH treats 2,500 gallons, repeat every 7 days as needed.

Directions

Floating Organic Matter

Calculate Surface Area: $Length \times Width = Sq. ft. of Surface$

- When treating floating organic matter with RUSH, treatments can be applied every 3-4 days as needed.
- Ponds with fish may experience lowered water oxygen levels as the floating matter decomposes.
- Ponds with high fish population should reduce the dosage by 50% and treat to effect every 2-3 days.

Pond Water

Calculate Total Gallons: $Length \times Width \times Depth \times 7.5 = Total Gallons$

- Apply evenly over the surface area and into the water.

Important: Do not overtrear - follow label instructions.
